Hampton Resource Centre forms part of the Sense College and is one of 7 education centres which provide educational provision for young adults with single or multi-sensory impairment & profound learning difficulties. We offer opportunities for learners to develop skills using a total communication approach, supporting and fulfilling their true learning and development potential.

We have our own specialist curriculum which identifies 4 phases of development across 5 domains

- Communication
- Conceptual & Sensory
- Movement, Mobility & Orientation
- Personal & Social Development
- World of Work

Each Deafblind person has their own individual schedule and plan designed to meet their specific requirements and this is reviewed on a 6 monthly basis. Their week might consist of a combination of programmes including:-

- Educational courses
- Vocational activities
- Creative arts
- Planned leisure activities
- Mobility training
- Sensory awareness
- Lifeskills
- Work placements

Sense College learners have access to specialist Vision & Hearing assessments and all programmes are delivered with access to Multi-Sensory Impaired (MSI) qualified teaching staff.

Learners have access to a college environment where a “Total Communication” approach is taken, focussed on the Deafblind persons preferred means of communication. This may be Sign Supported English, British Sigh Language (BSL), the Deafblind Manual Alphabet, Braille, Moon & Technological Aids to Communication. We also use pre-formed language communication methods such as Objects of Reference and Symbol based communication systems.
