Peterborough Crematorium was opened in 1958 and is owned and administered by the council. The Crematorium is located in approximately 26 acres of land, much of it left as original ancient woodland.

The trees enhance the tranquil atmosphere of the grounds and because of its origins; during the springtime, we have carpets of bluebells and other wild flowers. There are also a variety of birds and animals that visit the area.

There are a variety of memorials available at the crematorium to choose from as a symbol of remembrance for a loved one. More details can be found on our [memorials page](#).

Wildlife and nature
The trees enhance the tranquil atmosphere of the grounds and because of its origins, during the springtime, we have carpets of bluebells and other wildflowers. There are also a variety of birds and animals that visit the area.

Unfortunately some of these visitors, along with squirrels, can be less welcome in the formal areas as they will tend to nibble the formal planting and flowers which have been left on memorials. If you are lucky you may also see badger tracks in soft ground after rain.

It is also worth taking a few moments to stop and listen to the birds who make the woodland their home. If you are lucky you may even hear a woodpecker as it drills into a tree looking for insects. There are dedicated display boards in the memorial garden to help illustrate this.
